North Attleborough Electric Department

Expansion of the MuniNet-Announcement

In 2004, the North Attleborough Electric Department installed the Town Municipal Fiber Optic Network, or MuniNet. At that time, 27 town-owned sites were connected to the fiber optic network.

That fiber optic network is now being extended to provide for both the connection of additional town-owned sites and planned NAED electric system devices.

The work will be done by the firm Phoenix Communications Inc., awarded at the April 23, 2019 meeting of the NAED Board of Commissioners.

Work will begin on or about May 13, 2019.

The work will take place along the following streets:

Allen Avenue
Broad Street
Broadway
Bungay Road
Cedar Road
Clifton Street
Commonwealth Avenue
East Street
Elmwood Street
Emerald Square Mall

Freeman Street
Grove Street
High Street
Hoppin Hill Avenue
John L Dietsch Boulevard
John L Dietsch Square
John Rezza Drive
Kelley Boulevard
Landry Avenue
Mount Hope Street

North Washington Street
Old Post Road
Old Wood Road
Park Street
Raymond Hall Drive
Robert F Toner Boulevard
South Washington Street
Wagon Wheel Road
Whiting Street

Phoenix Communications, Inc. is based in Shrewsbury, MA and will have their crews begin 'framing', or installing the attachments to hold the fiber optic cable. Framing begins Monday, May 13. Once that is done, they will begin installing the new fiber optic cable.

It is anticipated all the fiber installation work will be complete on or before December 31, 2019.

Phoenix staff will be in vehicles bearing the company logo, and will be working with traffic details provided through the North Attleborough Police Department.

Vehicles likely to be seen include those below, and both reel trailers (carrying the fiber cable) and splice trailers:

Above: Bucket truck (left), Underground Services truck (right)

Above: Splice and Bucket truck (left), Service van (right)
